

Fan Pu Zeng

SOFTWARE ENGINEER

5032 Forbes Avenue, SMC 4936, Pittsburgh, PA 15289, USA

☎ (+1) 412-657-2741 | ✉ fzeg@andrew.cmu.edu | 🏠 <https://fanpu.io> | 📷 fanpu | 🌐 zengfanpu

Summary

I have 8 months of experience working in a seed-round startup (Saleswhale) that provided me with experience in web development in production, working in cross-functional teams, and translating product requirements into technical features. I am interested to work on the backend, DevOps, site reliability engineering, scale problems, automation, and infrastructure. I love startups, automating things, and I am a big fan and user of Arch Linux.

Education

Carnegie Mellon University

B.S. IN COMPUTER SCIENCE

Pittsburgh, PA, USA

Aug. 2018 - Expected May. 2022

- Activities: Plaid Parliament of Pwning (Cybersecurity & CTF competitions), CMU Math Club
- GPA: 4.0

Work Experience

Autolab

PROJECT MAINTAINER (DEVOPS AND INFRASTRUCTURE)

Pittsburgh, USA

Nov. 2018 -

- Maintainer of the open source project Autolab under mentorship of Prof. David O'Hallaron in CMU
- Used Ansible and Docker Compose to automate provisioning and configuring of frontend and backend grading servers as original setup flow was complex and required technical knowledge of Rails, Docker, and Nginx
- Help to support technical issues faced by the public in setting up and configuring Autolab

Saleswhale (YC S16)

JR. SOFTWARE ENGINEER

Singapore, Singapore

Nov. 2017 - Aug. 2018

- Regularly delivered core product features and bug fixes for the main Saleswhale app with Rails, Ember.js, RSpec, Redis, Sidekiq. Contributed to product meetings and sign-offs.
- Empowered our Customer Success team in performing account onboarding, management, and health reporting by architecting and building an internal tool from scratch with Rails, Ember.js, RSpec, SemanticUI, Gulp. Took ownership of it and regularly updated it to support the internal operational requirements of our product roadmap and in response to user feedback
- Drastically reduced product testing times and accelerated feature releases by building and automating the deployment of a testing framework micro-service with Rails, AWS SQS, Docker, Fabric from scratch to mock the asynchronous operations of another bottleneck micro-service
- Took charge of engineering support tickets filed by other departments related to codebase that I am familiar with, and to investigate, prepare, and deploy a fix if necessary
- Helped the Operations team meet key SLAs by developing a Tableau workbook from scratch to return insights on operational metrics and performance
- In charge of the algorithms & data structures segment of the technical interview for hiring new software engineers, and also helped to onboard new engineers to the codebase

Hwa Chong Institution

INSTRUCTOR

Singapore, Singapore

Oct. - Dec. 2016, Oct - Dec. 2017

- Instructor of Hwa Chong Institution's (HCI) Informatics Olympiad team
- Conducted weekly lectures and practice contests for around 20 students to prepare them for the National Olympiad in Informatics (NOI)
- Helped to achieve HCI's best ever performance in NOI in 2018, with 6 Golds and 3 Silvers from a team of 10. HCI was also ranked first in Junior College category

Singapore Armed Forces

COMPANY QUARTERMASTER SERGEANT

Singapore, Singapore

Jan. 2016 - Nov. 2017

- Commands and oversees the logistics division in 'J' Company, Specialist Cadet School
- Ensure the requisition, accounting, maintenance, and distribution of supplies to troops
